JUNE 5-11, 2022

Welcome to Ghost Ranch!

This is my first time not only teaching at GR, but visiting it as well so I am very excited to be here with you! I know we are going to have a wonderful time together.

I am thrilled to share my 'Inside Curve Alphabet' class with you. This playful hand is an original style I designed several years ago. The distinctive features of the letterforms are the inside curve, while the outer part of the letter is angular. How that is achieved is where the fun comes in!

If you have chosen to make the optional alphabet book, I will be bringing your book supplies with me. And if you've never done bookbinding before, please don't worry about the final project.

A bookbinder friend of mine taught me how to make a simple, accordion-fold book that has no gluing or sewing. She came up with an elegant design that is so easy to put together. I think you're going to love it!

Finally, my goal for this workshop is to help students understand how these 'Inside Curve' letters—as well as all letterforms—are not just the symbols with which we use to communicate. Rather, they are shapes made up of lines, circles, triangles and squares. Shapes which can be manipulated in creative ways. It is my hope that this workshop and the beauty of Ghost Ranch will help inspire you to make beautiful letters.

If you have any questions, please do not hesitate to email or call me. My contact information is below.

See you soon!

Julie
